

## Who is My Add On?

My Add On improves crutches and wheelchairs, not only to make them more beautiful, but also to make them more comfortable.

**How?** By designing universal add-ons that can be used for all types of crutches, wheelchairs, walkers etc.

### Practical!

You can click the magnetic crutches against your car, pick up your cutlery, keys and lots of other things!

## MySleeve

*When comfort matters.*

Sore hands

Falling crutches

Sweaty hands

## MySleeve

### No more sore hands

The MySleeve contains a gel patch that distributes the pressure points of your hand and protects your palms from severe pain.

### No more falling crutches!

The MySleeve has a magnet on top so that both crutches click against each other so you can quickly free your hands by leaning them against your body, a wall, a table, etc.

### No more slipping due to sweaty hands!

The surface of the sleeve is covered with micro textures that allow the hand to breathe. The material is skin-friendly and latex-free.

### Easy to clean!

Thanks to the dirt-repelling silicone, the MySleeve is clean in an instant.

### Pick up your crutch!

Did you drop a crutch before they were clicked together? No problem, just pick up the other crutch with the magnet.

### Disassembly without traces!

The MySleeve can be installed on both old and new crutches and it leaves no traces when the MySleeve is removed.

### Available in four personalities

Daring Pink

Subtle Black

Cheerful Yellow

Trendy Turquoise
